(c) As per reports received from States, the number of rural habitations provided with drinking water facilities during last three years and current year at the national level (Upto September, 2006) is as under:

Year	Total No. of Habitation Covered
2003-04	39736
2004-05	69639
2005-06	97196
2006-07	38003 (as per information received from State/UTs till 1.12.2006)

(d) Although State Governments strive to achieve 100% coverage for drinking water the situation is dynamic. Habitations may slip from full to partial coverage due to various reasons like depletion of ground water, rainfall variations, systems and sources having outlived their lives, increase in population over time, source becoming quality affected, systems working below rated capacity due to poor operation and maintenance, emergence of new habitations etc.
